

Integration support

We offer various support programs for integration and development projects – it includes any combination of the following:

- ✔ Relevant integration kits and SDKs with documentation and sample code
- ✔ Release implementation notes regarding changes to the interface
- ✔ Best practice integration methods and design samples
- ✔ All future updates to keep your implementation current
- ✔ Free technical training on biometric products and implementation thereof
- ✔ Onsite design support for custom architectural and system design
- ✔ 1 Year unlimited remote support via team viewer
- ✔ System certification on project completion

For integration support, talk to us. development@ideco.co.za
